PROFILE

Systems Programming student in Sofia with internships at Postbank and QuackStack, plus Nemetschek Bulgaria's Speed IT Up programme. I work mainly in C# and ASP.NET Core — REST APIs, relational data models and permission-based access control — with Angular and Blazor on the front end. Looking for a part-time junior or trainee software engineering role during the 2026–27 school year, and available full-time from graduation in 2027.

EXPERIENCE

Trainee Software Engineer | Postbank (Eurobank Bulgaria) | 22 July – 16 August 2026

- o Built an internal prototype for payment-card BIN classification and commission-rule configuration on a layered .NET 8 solution with a Blazor Server admin UI.
- o Implemented JWT authentication and permission-based access control across the Web API, plus bulk CSV import of BIN data with a conflict-resolution workflow.
- o Added a full audit trail recording before/after values on every data change, backed by an xUnit test suite.
- o Worked to a professional Git workflow: feature branches, a protected main branch and pull-request review.

Backend Intern | QuackStack | 1 – 11 July 2026

- o Developed REST endpoints and the data model for a taxi-hailing demo application on an Express and Supabase backend.
- o Implemented ride booking and driver-matching logic.
- o Integrated Stripe to handle fare payments.

Speed IT Up School Edition 2025 | Nemetschek Bulgaria | 1 – 14 July 2025

- o Worked on backend software development using C# and Entity Framework.
- o Contributed to application features related to user and event management.
- o Covered the project manager, business analyst, UX, developer and QA roles, then built a software project end to end and presented it publicly.

SELECTED PROJECTS

BinTool (Postbank internship project)

Card BIN Classification & Commission Configuration Tool

- o Classifies payment-card BINs and resolves tiered commission rules into a transaction fee
- o Built a layered .NET 8 solution — Domain, Application, Infrastructure and Web API — with a Blazor Server admin UI
- o Secured every endpoint with JWT authentication and permission-based roles

- o Implemented bulk CSV import of BIN ranges with conflict detection and an administrator resolution workflow
- o Added an audit trail recording before/after values on every change, covered by 40+ xUnit test classes

Tech: C#, .NET 8, ASP.NET Core, Blazor Server, EF Core, JWT, xUnit

Link: <https://github.com/OrlinStefanov/PostbankInternshipApp>

TeamUp (team project)

Team Collaboration & Gamified Productivity Platform

- o Built a full-stack collaboration platform with real-time messaging
- o Implemented Discord-style chat functionality using SignalR
- o Developed leaderboard and productivity tracking features
- o Created scalable backend architecture using .NET and PostgreSQL

Tech: C#, .NET, SignalR, EF Core, PostgreSQL, Angular

Link: <https://github.com/OrlinStefanov/TeamUp>

Taxi App Backend (QuackStack internship project)

Ride-Hailing Demo Backend & Payments

- o Built REST endpoints and the data model covering riders, drivers and the ride lifecycle
- o Implemented booking and driver-matching logic on an Express and Supabase backend
- o Integrated Stripe for fare payment on completed rides

Tech: Node.js, Express, Supabase, Stripe, REST API

Repository: private (QuackStack LTD)

Mealer (personal project)

Recipe Sharing & Discovery Platform

- o Developed a social platform for recipe sharing and user interaction
- o Created intelligent ingredient-based recipe suggestions
- o Designed relational PostgreSQL database architecture
- o Built responsive Angular frontend

Tech: C#, ASP.NET Core, EF Core, PostgreSQL, Angular, TypeScript, Bootstrap

Link: <https://github.com/OrlinStefanov/Mealer>

TECHNICAL SKILLS

Languages: C# • Java • JavaScript • TypeScript • SQL • C/C++

Frameworks: .NET • ASP.NET Core • Angular • Blazor • EF Core • SignalR • Express

Databases: PostgreSQL • MySQL • SQLite • SQL Server

Tools: Git • Visual Studio • VS Code • Unity • Supabase • Stripe • PyCharm

EDUCATION

SPGE "John Atanasov" – Systems Programming | Expected Graduation: 2027

LANGUAGES

Bulgarian (Native) | English (C1) | German (A2)

ACHIEVEMENTS

🏆 1st Place Team Award – Digital Technology & Programming Festival 2023

🏆 3rd Place – ACS IGNITE Hackathon, February 2026

🎮 Telerik School Academy — Game Development, Level 4, grade A, one level skipped

🎓 Cambridge C1 Advanced (CAE)
